

Intertek’s *Certified Fire Door Inspector* Program

Requirements of NFPA 80

The 2007 edition requires documented annual inspections of fire-rated door assemblies. NFPA 80 requires these inspections be performed by individuals who are knowledgeable of the types of door assemblies being inspected. Through Intertek’s *Certified Fire Door Inspector* Program, inspectors will be certified to properly perform these annual inspections. Additionally, a program specific inspection label can be applied to each assembly, providing visual evidence of the inspection for the building owner and the Authority Having Jurisdiction (AHJ).

The Benefits of Becoming Certified by Intertek

Becoming a *Certified Fire Door Inspector* is based on successfully completing The Door and Hardware Institute’s (DHI) Fire Door Assembly Inspection class (FDAIc) as well as the pre-requisite classes. After the completion of these requirements, DHI will notify Intertek and the individual will be eligible to register and become an Intertek *Certified Fire Door Inspector*.

This program allows companies to purchase and apply an Intertek program specific label to the fire-rated assembly after inspection. The label identifies that the inspection was conducted by a *Certified Fire Door Inspector* and states the year of the inspection. Companies offering annual fire door inspection services should utilize Intertek *Certified Inspectors* to assure AHJ’s confidence in the inspection.

Intertek understands your need to limit personal liability and increase public safety. This program allows you to be proactive and ensure that fire door assembly inspections are completed on a timely basis, are convenient to your schedule, and that they offer a cost effective solution.

Gain a Competitive Advantage with these Inspection Results

- Time saved for property managers and building owners.
- Reduction in liability due to pro-active annual reviews.
- Cost effectiveness to property managers and building owners.
- Compliance with NFPA 80 (2007 edition) requirements.

Certified Fire Door Inspector Program

About Intertek

For more than 100 years Intertek has served as the testing, inspection, and certification leader for building products and materials. Intertek’s Warnock Hersey Mark has long been the industry preferred certification mark.
